“ *My Mother was so smart and to the end never showed any signs of dementia She was a friend, a confidant, my biggest supporter We lost our dear friend John just six weeks ago in a tragic car accident He took care of us and made sure my Mom and I were taken care of I know that my Dad and John were waiting for her and welcomed her I kept telling her that Dad was calling her home, he had been waiting patiently and she died on his birthday Her years of pain and suffering are over Torn between wanting to go to be with my Dad and staying with me I told her it was ok to go She said she would send me signs she was ok and near me She already sent me pennies from heaven The last 6 years I spent my life centered around my Mother and she was saying that it was time I moved on, had a life of my own How do you go on when you have never been without your Mother She didnt deserve such disrespect from her family and she knew exactly what would go on when she died And Mom, You were right all along But then, you always were Too painful to say good-bye, it's only till I meet you there I love you Mom Your Daugfhter*

---
